Target Audience
The symposium is designed for primary care providers, nurse practitioners, physician assistants, nurses, and specialists in related fields including internal medicine, surgery, oncology, and genetics.

Purpose and Content
This event is a program focused on clinical cancer genetic testing as well as management for individuals with hereditary cancers. It will review the use of germline and somatic genetic testing both on an individual patient level as well as on a screening basis. It will also highlight both traditional testing and management options as well as state-of-the-art technologies in both areas and the pros, cons, and limitations of these newly available technologies. The program will also consider the ethical perspectives of clinical genetics in the field of cancer. The learner should gain a better understanding of the use of cancer genetics as it is applicable to their scope of practice (e.g., correct use of testing, identification of at-risk patients for referral, surveillance in accordance with current management guidelines).

Educational Objectives
Upon completion of this symposium, the participants should be able to:
• Identify the role of genetic testing in the management of cancer.
• Critically analyze available cancer genetics testing options to make an informed and appropriate laboratory and test selection.
• Discern and consider ethical ramifications of cancer genetic testing.

Accreditation
The University of Texas Southwestern Medical Center at Dallas is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Continuing Education Information
The University of Texas Southwestern Medical Center designates this educational activity for a maximum of 4.75 AMA PRA Category 1 Credits™. Physicians should only claim credit commensurate with the extent of their participation in the activity.

UT Southwestern University Hospitals is an approved provider of continuing nursing education by the Texas Nurses Association, an accredited approver by the American Nurses Credentialing Center’s Commission on Accreditation.

This activity provides 4.75 contact hours.

Conflict of Interest
All persons in the position to control the content of an education activity are required to disclose all relevant financial relationships in any amount occurring within the past 12 months with any entity producing, marketing, re-selling, or distributing health care goods or services consumed by, or used on patients. A primary mechanism to resolve identified conflicts of interest is a content review that occurs prior to the activity.

Discussion of Off-Label Use
This course is mentored educate physicians with what is currently in use and what may be available in the future. There may be “off-label” use discussed in the activity. Speakers have been requested to inform the audience when off-label use is discussed.

Registration
Registration entitles the participant to attend the conference, obtain all course materials, continental breakfast, lunch and refreshment breaks during the meeting.

Enrollment is confirmed upon receipt of registration form. Please register early. We cannot guarantee course materials on the day of anyone registering after September 5, 2015.

Cancellation Policy
The Office of Continuing Education reserves the right to limit registration and cancel courses, no less than one week prior to the course, should circumstances deem this necessary.

Cancer Genetics: Going Beyond the Guidelines
Saturday, September 19, 2015
UT Southwestern Medical Center
T. Boone Pickens Biomedical Building
NG3.112 Auditorium
6001 Forest Park Road
Dallas, Texas 75390

Target Audience
The symposium is designed for primary care providers, nurse practitioners, physician assistants, nurses, and specialists in related fields including internal medicine, surgery, oncology, and genetics.

Purpose and Content
This event is a program focused on clinical cancer genetic testing as well as management for individuals with hereditary cancer syndromes. It will review the use of germline and somatic genetic testing both on an individual patient level as well as on a screening basis. It will also highlight both presymptomatic and management options as well as state of the art technologies in both areas and the pros, cons, and limitations of these newly available technologies. The program will also consider the ethical perspectives of clinical genetics in the field of cancer. The learner should gain a better understanding of the use of cancer genetics as it is applicable to their scope of practice (e.g., correct use of testing, identification of at-risk patients for referral, surveillance in accordance with current management guidelines).

Educational Objectives
Upon completion of this symposium, the participants should be able to link the educational objectives to Core Competencies (Patient Care, Medical Knowledge, Practice-Based Learning, Communication, Professionalism, System-Based Practice, Inter-Disciplinary Teams and Quality Improvement) and be able to:
- Increase knowledge of the language and basic concepts of cancer genetics.
- Review currently available clinical options for germline and tumor cancer genetic testing.
- Review guidelines and options for management of patients with hereditary breast, gynecologic, and/or colorectal cancer syndromes.
- Critically analyze available cancer genetics testing options to make an informed and appropriate laboratory and test selection.
- Discern and consider ethical ramifications of cancer genetic testing.

Accreditation
The University of Texas Southwestern Medical Center is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

UT Southwestern Medical Center Office of CME has transitioned to a new online registration system.

After clicking on the registration link, you will be prompted to login to an account within the online system in order to register. If you have not previously registered for any courses you must first create a user profile and then can go back and register for the course.

Program Agenda - Saturday, September 19, 2015

7:30 AM  Registration & Breakfast
8:00 AM  Opening Remarks & Introductions
8:10 AM  Overview of Current Landscape in Cancer Genetics - Sharon Plon, M.D., Ph.D.
9:00 AM  Break
9:15 AM  Management of Hereditary Breast Cancer - Screening - Emily Eads, M.D.
9:30 AM  Management of Hereditary Breast Cancer - Surgery - Roshni Rao, M.D.
9:45 AM  Management of Hereditary Breast Cancer - Treatment - Barbara Haley, M.D.
10:00 AM  Management of Hereditary Gynecologic Cancers - Siobhan Kehoe, M.D.
10:30 AM  Break
10:45 AM  Management of Hereditary Colorectal Cancer - Samir Gupta, M.D.
11:15 AM  Genomic Tumor Testing - Jason Park, M.D., Ph.D.
11:30 AM  Evaluating Treatment Options and Choosing a Test - Megan Frone, M.S., CGC
11:45 AM  Networking Lunch
12:30 PM  Hereditary Cancer: The Patient Experience - Denise Rupli, B.S.N., R.N., IBCLC
12:45 PM  The Role of Genetic Counseling in Cancer Genetics - Caitlin Mauzer, M.S., CGC
1:00 PM  Population Screening for BRCA and Lynch Syndrome - Linda Robinson, M.S., CGC
1:20 PM  Whole Genome Sequencing: The Future of Cancer Genetics? - Theodora Ross, M.D., Ph.D.
1:40 PM  Closing Remarks and Evaluations
2:00 PM  Adjourn
