

SPECIFIC AIMS (1 PAGE)

Summarize the broad, long-range objectives and goals of the proposed Research Program.

[See below for additional sections]

RESEARCH PLAN (12 PAGES)

- *When writing your narrative, please consider the following message from Dr. de Vere White:
 - *The whole emphasis has changed and they now welcome descriptions of how the SRs contribute to the research of the Center. Most SRs devote 2 pages to describe this. Some even describe how they interact with other Shared Resources.**

A. Shared Resource Overview

- *Include any responses to prior critique or EAC suggestions*

B. Personnel and Management

- *Describe the qualifications of the shared resource director(s) and the competence of key technical staff*
- *Describe the management structure*

C. Major services, Technologies, Equipment and Expertise provided

- *Describe major services, technologies, equipment, and expertise provided*
- *Describe their importance to the scientific needs and objectives of the Center (i.e., how the shared resources support the research of the Programs).*

D. Cost-effectiveness

- *Describe the cost-effectiveness of the resource relative to other options for obtaining the service, such as outside vendors, when applicable.*

E. Users

- *Describe your users base*
- *What is your anticipated use of service for the next period?*
- *User metrics: [Placeholder] Do not complete this table – we will use the metrics you give us (see below) to fill out this table.*

<i>Total number users (do not include members from other Centers)</i>	
<i>Percent of users who are center members with peer reviewed support</i>	
<i>Percent of users who are center members without peer reviewed support</i>	

F. Accomplishments

- *How was the SR used to contribute to the research of the Center?
 - *Provide specific examples of projects, e.g., by program*
 - *[optional] Interactions with any other SRs?*
 - *[optional] Did your SR contribute any products for resource sharing (e.g., resources available to the larger scientific community – e.g., OBOC libraries, genomic mutation panel, mouse models)?**

G. Processes relevant to facility planning and oversight

H. Policies

- *Describe policies on operation and use of the shared resource, e.g., access, priorities, hours of operation, staffing, etc., and charge back systems.*
- *For institutionally managed (as opposed to Cancer Center managed) resources, describe the Center's role in planning and oversight of the shared resource(s).*

I. Future plans

USER INFO

Supply a list of users (2010 – 2015). Please indicate dates (years) of usage (e.g., 2015 vs 2012).

This will be used to populate the tables in the narrative and help with generating pub lists.

PROJECT SUMMARY/ABSTRACT (30 lines)

[See below for additional sections]

ATTACHMENTS

- **Sources of support for Shared Resources**

The requested budget for each Shared Resource should reflect realistic needs in terms of support from other sources (e.g., institutional or Cancer Center support or recovery from chargebacks) and any other specific additional requirements. Provide the following information for the most current grant year and for the proposed period of support.

Sources of Support for Shared Resources				
Income source	Current Support (\$)	Percent of Current Total Budget	Proposed Support – Year 1 (\$)	Percent of Proposed Total Budget
CCSG				
Fee for Service/Chargebacks				
Other				
Total Operating Budget
